Packaging Procedures
For Reusable Containers and Corrugated Boxes

How to Prepare Your Waste Container for Pickup

1. Corrugated Boxes:
   - Turn over and seal bottom flaps with tape
   - Auto-locking boxes, engage bottom flaps
   - No set up required for Reusable Containers

2. Line the container and fill with medical waste.

3. Tie a knot.

4. Close the lid.
   - Don’t put loose sharps in liners.
   - Don’t let bags stick out of boxes or containers.

Regulatory Requirements

GENERAL
- Generators are responsible for packaging their waste.
- Each bag must be hand tied by gathering and twisting the neck of the bag and using a tie or hand knot to secure the bag, and each container must be securely closed.
- Closed bags must not be visible once secondary container is closed.
- Improperly packaged containers or damaged containers will be denied pick up or returned to the generator.
- Only Regulated Medical Waste can be placed in Stericycle containers.

SHARPS
- Sharp materials (“sharps”) must be placed in a puncture-resistant container designed for “sharps” waste. “Sharps” include needles, syringes, broken glass, scalpels, culture slides, culture dishes, broken capillary tubes, broken rigid plastic and exposed ends of dental wires.
- All sharps containers should be properly closed before being placed into secondary containers.
- No loose sharps are permitted outside of sharps containers.
